

THE JOURNAL OF THE SOCIETY OF AUTOMOTIVE ENGINEERS

INDEX TO VOLUME XVII, JULY-DECEMBER, 1925

	PAGES	Aircraft			
July	1-144	Air-cooled engine development	398	Analysis of machine-tool maintenance (A R Kelso)	309, 385
August	145-218	Carriers	454	ANDERSON, R M, ON DRILLING-MACHINE APPLICATIONS	307
September	219-296	Wood for	444	Annealing, results of insufficient	290
October	297-410	Aircraft-engine development (Lieut-Com E E Wilson)	430	Annual dinner announced	532
November	411-512	Aircraft engine laboratory inspection	316		
December	513-636	Airfoils, knowledge of theory lacking	438		
		Air-input type of noise detectors	121		
				Annual Meeting, S A E	
A				Carnival announced	427, 532
Acceleration		Air Mail Service		Date changed	427
High price of	94	Airways and airports, equipment of	488	Preliminary announcement of topics to be discussed	532
Smooth, rapid, reduces costs	593	Emergency-field layout and equipment	488	Applying jigs and fixtures to engine-block machining (J G Moohl)	308, 323
Accelerometer gives only relative idea of comfort	38	Engine overhauls and life	487		
		Flying personnel, qualifications	487		
Accelerometers		Ground personnel, composition	488		
Carbon-stack	112	How prevailing winds affect regularity	435	Arc of Contact of Brakeshoes	
Description of new	546	Maintenance of flying equipment	487	Empirical rule for determining	67
Essentials of design	111	Night schedule too fast	436	Recommended graphical method for determining	70
Instrument construction and operation	112	Operation of	423, 486	Army mule to motor truck (A C Dalton)	530
Low deflection important	111	Pilots must know their runs	487	Army-Navy standards	30
Method of operation	113	Qualifications of the flying personnel	487	Army-Navy Standards Conference	227
Study of available	112	Remarkable reliability of	434	ARNOLD, LIEUT LESLIE P, ON AIR SERVICE AS THE WORLD FLIERS SAW IT	430
		Safe airways possible at low cost	489	Asia, new	507
		Supervisory organization	486	Asphaltic concrete roads (C P Jensen)	536
		Airplane-engine generator-problems	510	Assembling line inspection	381
				Assembling of cross-assemblies	396
Accidents		Airplanes			
British motor, and insurance	227	Comparison of present and previous performances	437	Audiograms	
Grade-crossing	581	Constructors turning to air-cooled engines	457	Acuity of hearing	118
Greatly reduced with gasoline-electric motorcoach	593	Control-areas defined in terms of wing-area	439	Showed what	4
Mental defects that cause	164	Coordination of engineering and manufacturing	442	Audiometric method	112
Mentally unfit are real hazards	163	Doping and finishing	447	Auditory masking and dynamics of the inner ear	116
Reduction of automobile, by use of psychological tests	13, 163	Earth-induction compass	485	Automobile engine troubles—their causes and remedy (Frederick Alberty)	520
Accuracy of die-castings	256	Engine generator-problems	510	Automobile headlighting symposium	559
		Engines	440	Automobile-noise measurement (H C Snook)	4, 115, 617
Addresses		Evolution of modern racing	420, 476	Automobile testing for the public (F E Edwards)	520
Cattell, Dr E J	527	Fabrication methods	446		
Keller, K T	307	Final tests and results	489		
Keys, C M	421	High aspect-ratio desirable	439		
Transportation banquet	527	Kind of service to come	457		
Vauclain, S M	528	Landing gear	477		
Advertising unwanted product causes loss	170	Light, and low-powered flying	420, 437		
Aerial transportation (W B Stout)	533	Light, develop reliability	438	Automobiles	
		Materials	444	Adaptability of friction drive to light	210
Aeronautic Division, S A E		More reliable than trains	435	Advantages of friction drive	211
Activities	227	Must be kept in the air	457	Air-cooled engines for	503
Report at Semi-Annual Meeting	30	Powerplant	478	Assembling line inspection	381
		Powerplant weight	497	Assembling of cross-assemblies	396
Aeronautic Meeting, S A E		Predictions fulfilled by the Wren	438	Back panel	394
Announced	149, 223	Record of operating cost	456	Basis for appraisal of riding discomfort	37
Banquet	315, 421	Relation of engine size and weight	439	Bearing of Research Department work on car developments	189
Program	314	Some aspects of inspection	311, 441	Better, poorer service	550
Reviewed	419	Speeds	497	British accidents and insurance	227
Sessions announced	315	Structural design	438	Camping equipment	229
Aeronautic recommended practices	30	Structural requirements	442	Clutch design	365
Aeronautic Safety Code	30	Thrust to weight of powerplant, relation of	498	Complexity of cellulose-nitrate finish	187
Aeronautic Safety Code (H M Crane)	419	Weights and sizes of parts	476	Cracking starts in color and rubbing coats at scratches in finishing varnish	186
Aeronautic Safety Code, published	321	What commercial, must accomplish	455	Designing with consideration for repairmen's tool equipment	516
		What is required of commercial	456	Drilling of body bolt and engine bolt-holes	396
Aeronautics		Wing and tail surfaces	477	Elementary dynamics of spring-suspension	17, 37
Admirals and generals now asking questions	450	Wood for	444	Engine troubles—their causes and remedy	520
Conditions affecting progress	448	Airports and airways, equipment of	488	Fabrication of shroud	394
Enlivened by investigations and bombs	449	Air Service as the world fliers saw it (Lieut Leslie P Arnold)	430	Factor of public opinion to reduce accidents	13
Europe's policy and America's lack of policy	450			Factors determining the minimum stopping-distance of	192
R 38 Memorial Prize	349	Airways		Finish failures overcome with pyroxylin enamel	183
Recommended practices	30	Airports and, equipment of	488	Formula for safe speeds	86
Small industry makes a big noise	448	Safe, possible at low cost	489	Friction transmission for	210
Some strong man will compose the situation	451	ALBERTY, FREDERICK, ON AUTOMOBILE ENGINE TROUBLES—THEIR CAUSES AND REMEDY	250	Fundamental causes of finish failure	187
United States abreast of Europe in design	449	Alcohol and castor oil, neutralized, adopted for hydraulic-brake system	235	Fundamental principles of headlighting	559
What the public is interested in	449			High-speed thoroughfares advocated	12
Agricultural cooperative associations	326	Alignment		Hot stampings and their production	299, 452
Agricultural expansion	291	Important in fitting bearings	336	Inadequate brakes and lights	579
Agricultural marketing, cooperative	63	Parts, secret of success	337	Inspection methods	311, 376
		ALLEN, H H, ON FACTORS DETERMINING THE MINIMUM STOPPING-DISTANCE OF AN AUTOMOBILE	192	Insurance	580
Agricultural Power Equipment Division, S A E		Alloy-steels, use of	200	Interchangeability of doors	395
Activities	545	Alloys		Long distance touring	228
Report at Semi-Annual Meeting	30	Die-casting	255	Manufacturer's reflections on the service field	549
Air-cooled aircraft engine development (S D Heron)	398	Role played by	182	Measuring motion definitely	17
		Aluminum alloys, progress with	317	New devices for improving operation	520
Air-Cooled Engines		American buying-power and price-level	375	Noise measurement	4, 115, 617
Constructors turning to use of, in airplanes	457	American isolation	124	Operation and advantages of the piece-work service-system	161
Radial, largest	501	American Society for Testing Materials, supplement to book of standards	322	Periodical inspection sold with "Phaeton," use of, increasing	516
Air-cooling for airplane engines	502				319

Automobiles (Concluded)

Philosophy of weight reduction	436
Preventive service	515
Pyroxylin enamel air-dries quickly leaving a hard, tough, durable film	186
Pyroxylin refinishing-practice	245
Railroad earnings, effect of	583
Ratio of population to cars in use	431
Rear-wheel tests of 100	539
Reduction of accidents by use of psychological tests	13, 163
Remediable faults in, some	92
Small	428
Special requirements of the Orient	540
Sunshine and heat cause rapid failure of finishes	185
Synchronous vibration of parts	93
Testing for the public	520
Tests to determine driver fitness	164
Time relation of body rise	41
Trend toward reconditioning	171
Usual finishing process and coats	184
What is safe speed?	12, 81
Why lost power	552
Automotive-clutch, development, history of	361
Automotive engineer, what, can do to make highway safe	11
Automotive Equipment Exposition	425, 521

Automotive Industry

Cooperative effort of machine-tool builders and	360
Diesel-engine development	344
Division of Simplified Practice in	321
Expenditure for development	360
Infantual	528
Machine-tool needs of	305, 359
Safety measures in plants	480

Automotive Products

Advertising unwanted, causes loss	170
All functions must be performed	168
All middlemen are wholesalers	169
Cannot ignore fundamental business law	168
Consumer acceptance a vital necessity	169
Consumer decrees success or failure	168
Distribution of	167
Giving too much value	170
Large companies dropping distributor system	171
Production needed for national distribution	170

Automotive Transportation Meeting, S A E

Announced	425
Banquet	527
Banquet announced	315, 425
Date changed	315
Freight-handling session	425, 524
Gasoline-electric inspection	426
Motorcoach-operation session	426, 528
Parade of equipment announced	315
Plant inspection announced	316
Preliminary announcement of papers	315
Program	426
Reviewed	521
Standardization session	425, 522
Visit motorcoach service-station	531
Automotive transportation preventive service (G F Lord)	515

Aviation

Aircraft-engine development	420
Air Service as world fliers saw it	430
Commercial	533, 534
Commercial, in the United States	149
Commercial airline possibilities, many	534
Engine development, some aspects of	496
Frontier facts in air transportation	354
Fundamental requirements for commercial	422, 455
Germany leading Europe	533
How it feels to fall 1500 ft.	106
Industrial flying	114
Kind of service to come	457
Knowledge of theory of airfoils lacking	438
Minimum power essential for successful commercial transport	440
Navy board ignorant on subjects	450
North America ideal for air lines	458
Operating cost and depreciation	422
Operation of Ford airlines	456
Popular demand for	421
Present phase of commercial	430
Radio for navigation and military purposes	430
Relation of aircraft engines to specific needs of naval	430
Reliability as a factor in air-transportation efficiency	423, 433
Requirements of satisfactory light engines	440
Axle and Wheels Division, S A E, personnel	475

Balancing

Clutch, and its effect upon design	367
Machine tool parts	360
BALDWIN, H S, ON ELECTRIC DRIVE FOR GASOLINE-PROPELLED MOTORBUSES 14,	95

Ball and Roller Bearings Division, S A E

Activities	413
Personnel	475
Report at Semi-Annual Meeting	31
Ball Bearings Sectional Committee, personnel	475
Ball Bearings	
Numbers proposed, new	413
Thrust, clutch type	31
Ball-impression hardness-tests	177
Ball-handle threads adopted	544
Ball-nut and lever assembly in brake-control system	88

Balloon Tires

Blowouts	539
Heavy vehicles	537
Motorcoaches	537, 538
Service record	538
Severe service	228
Balloon tires for heavy vehicles (J E Hale)	537
Balloon tires for motorcoaches (J Linforth)	538
BARBER, A B, ON HIGHWAY SAFETY FACTORS	11
BARNARD, D P, 4TH, ON LUBRICATION OF PLAIN BEARINGS	537
BARNARD, D P, 4TH, ON MECHANISM OF LUBRICATION	539
BARNARD, D P, 4TH, ON OIL-FLOW IN COMPLETE JOURNAL BEARINGS 9, 205,	459
Basic factors of production (K T Keller)	494
Bayonet-type connectors not suitable for motorcoaches	151

Beam

High intensity in foreground	562
Remedy lies in good headlights with deflecting	576
Bearing of Research Department work on car developments (H L Horning)	189

Bearings

Alignment most important in fitting	336
Kingsbury's experiments	537
Lubricating oil tests	288
Lubrication of plain	537
Oil-flow in complete journal 9, 205,	459
Operation of inserting halves	337
Rules for lubrication	537
Belt drive	129
Bendix-Perrot brake control-system	87
Best location for carburetor intake (A H Hoffman)	172
Bibliography of head-lamps	156
Black baking-enamel on passenger-car bodies	541
BLANCHARD, DONALD, ON NEW DEVICES FOR IMPROVING CAR OPERATION	520
Block-brakes, force relations in simple	65
Blowouts of balloon tires	539

Bodies

Drilling of bolt holes	396
Finishing	246
Finishing the outside of motorcoach	591
Magnitude of upward forces exerted on	42
Nomenclature survey	227
Standardized	591
Steam heated	330
Time relation of rise	41
Bolt holes, drilling of body and engine	396
Bolt, Nut and Rivet Proportions Sectional Committee, activities	226
Bolt standard to be revised	151
Bolts, plow, proposed standardization	226
Book of American Society for Testing Materials standards, supplement to	322
BOYD, T A, ON FUEL FROM THE SERVICE STANDPOINT	520

Brake Chattering

Analytical analysis of	68
Effect of material on	69

Brake-Control System

Bendix-Perrot	87
Carrier bracket and universal-joint assembly	88
Lever and ball-nut assembly	88

Brake-Drums

Inspection of	384
Transmission, considered	543

Brake-Lining

Increased life with three-shoe brakes	89
Standard extended	413
Brake session at Semi-Annual Meeting	18

Brakes

Advantages of three-shoe	90
Analytical analysis of squeaking and chattering	68
Equalizers and linings discussed	20
Factors affecting qualities	64
Four-wheel versus two-wheel	89
Fundamentals of design	18, 64, 462
Heavy vehicles	538
Hydraulic and their applications	19
Hydraulic-brake units, development difficulties and design of	19, 231
Hydraulic, development recounted	19
Inadequate	579
Increased life of lining with three-shoe	80
Mechanical four-wheel elements described	18
More area with six-wheel motorcoaches	621
Motorcoach	590
Motor-vehicle safety code	318
Multiple-shoe	71
Railroad type of	72
Readjustment not needed	553
Three-shoe self-energizing, features of	88
Wear and pressure distribution	66
Wear curves for studying adjustment	67
Brakes for heavy vehicles (Louis C Huck)	538

Brakeshoes

Empirical rule for determining arc of contact	67
Recommended graphical method for determining arc of contact	70

Brake Squeaking

Analytical analysis of	68
Effect of material on	69
"Breakdown" of the cities	36
Braking and steering	522
Braking and steering of multi-wheel motor vehicles	238
BREER, CARL, ON MANUFACTURER'S REFLECTIONS ON THE AUTOMOTIVE SERVICE FIELD	519, 549
Bristol engine	506
British motor accidents and insurance	227
British to conduct highway research	510
BROWN, R W, ON RIDING-QUALITIES OF MOTOR VEHICLES	16, 107
BUCKINGHAM, EARLE, ON PROBLEM OF GEAR PRODUCTION	305, 325
BUCKINGHAM, EARLE, ON TRANSMISSION NOISES AND THEIR REMEDIES 21, 62,	460
Budget, machine-tool maintenance	388

Budget System

Application of	281
Calculating gross and net profit	282
Day-by-day record of business	284
Direct expenses and their allocation	283
Explanation of direct-expense accounts	283
How prepared	281
Methods used in operating a	283
Service-station management and	280
Budget system as an aid to service-station management (J E Mills)	280
Bulbs, frosted	564, 565
Bureau of Public Roads, tests of road impact	110
BURKHARDT, OTTO M, ON FUNDAMENTALS OF BRAKE DESIGN	18, 64, 462
Business session at Semi-Annual Meeting	5
Buying-power and price-level, American	375

Cable

Corona tests	150
Wire, insulated	31
Calculation and design of coiled springs (E W Stewart)	195
Camping equipment and motor cars	229
Carbon formed by decomposition	266
Carburetor intake, best location for	172
Carburetors, production of Ford	307
CARENS, W G, ON MACHINE-TOOL SELECTION	306
Carrier bracket and universal-joint assembly in brake-control system	88
Castings, making	300
Castor oil and alcohol, neutralized, adopted for hydraulic-brake system	235
Cattell, Dr E J, address	527

INDEX TO VOLUME XVII

627

CAUTLEY, J R, ON DEVELOPMENT OF A
MODERN FOUR-WHEEL MECHANICAL
BRAKING-SYSTEM 18, 87, 470
Cellulose-nitrate finish, complexity of 187
Centrifugal governor 269
Characteristics of the internal-combus-
tion-engine governor (Edward F
Lowe) 268

Chassis

Noises and diagnosis of engine trouble 518
Springs tests 384
Velocity of sound in 4
Checking the crankshaft and the crank-
case 335
Choking and throttling of engine 57
CHRISTMAS, CAPT J K, ON TESTING OF
AUTOMOTIVE EQUIPMENT AT ORD-
NANCE PROVING GROUND 534
Chronograph, construction and operation 112
CHURCH, MAJOR ELIHU, ON HANDLING
FREIGHT AT RAILROAD TERMINALS 430
Cities, "breakdown" of the 36
CLARK, E A, ON WHEELS FOR PNEUMATIC
TIRES ON HEAVY-DUTY VEHICLES 538
Classification of engineering and indus-
trial standards (F J Schlink) 414
CLAYDEN, A L, ON CYLINDER AND EN-
GINE LUBRICATION 11, 58, 472
CLAYDEN, A L, ON STEAM COOLING 432
Cleaning and examination of parts 335
Clutch discs, limits for 31

Clutches

Balancing and its effect upon design 367
Drive-shaft and, need balancing 93
Engagement methods 363
Friction facing for 361
Future possibilities 367
History of automotive, development 361
Molded and woven friction facings
compared 362
Non-adjustable types of 366
Passenger-car design 365
Problem of thermal efficiency 364
Push-type versus pull-type control 366
Release-sleeve designs, improvements
in 366
Special, for rail-cars is of sturdy de-
sign 78
Thermal efficiency of 364
Troubles analyzed 556
Two classes of friction facings 362
Coal production, world 349
COBB, P W, ON INVARIABLE AND ASYM-
METRICAL LIGHTING 569
COLEMAN, T E, ON ENGINE LUBRICATION 535
COLLINS, E F, ON TESTING OF SHEET
STEEL 290
Commercial aviation (J P Van Zandt) 533, 534
Commercial aviation in the United States 149

Committees

Ball Bearings Sectional, personnel 475
Bolt, Nut and Rivet Proportions Sec-
tional, activities 226
Petroleum Products and Lubricants,
personnel 475
Scientific and Engineering Symbols
and Abbreviations Sectional, person-
nel 475
Specifications for Zinc Coating of Iron
and Steel Sectional, personnel 619
Commodity research 493

Compass

Distance reading of a 485
Earth-induction airplane 485
Induction 485
Induction advantages 485
Complexity of cellulose-nitrate finish 187
Compression-type fittings extended 32
Compression-type tube fittings 32
Compressive-strength 177
Conditions affecting aeronautic progress
(C M Keys) 448
"Conferences" versus "training" foremen 302
Conical springs a cure for valve-spring
breakage 198
Connecting-rods of airplane engines 506

Connectors

Bayonet-type not suited for motor-
coaches 151
Screw-type recommended for motor-
coaches 151
Constantinesco torque converter 140
Consumer acceptance a vital necessity 169
Containers, requirements for freight 526
Continuous production 508
Continuous variable gear transmission 130

**Control-Lever Ball-Handle Insert
Threads**

Not used 414
Standards adopted 544
Control of material and cost 494
Cooperative agricultural marketing 63
Cooperative associations, agricultural 326
Cooperative research 558
Coordinating gear design and production
methods (Perry L Tenney) 304, 372
Coordinating the shock-absorber with the
spring 49
Coordination of railroad and motor truck
in freight handling (Joseph L Scott) 524, 607

Copper

Producing single large crystals 286
Structure of crystals 286
Super-conducting 286
Corona cable-tests 150

Corrosion

Notes on crankcase 517
Possible remedies 518
Water causes 517
Corrosion session at Service Engineering
Meeting 517

Costs

Changes cause loss of efficiency and
increase 522
Control of material and 494
Finished sheet-metal parts 392
Liability, lower with six-wheel motor-
coaches 621
Machine-tool repair and maintenance 388
Maintenance, lower with six-wheel
motorcoaches 621
Operating and depreciation of air-
planes 422
Powerplant 498
Record of airplane operation 456
Safe airways possible at low 489
Saving in first, by standardization 524
Smooth, rapid acceleration reduces 593

Council Meetings, S A E

June 106
October 475
November 619
Cracking of oil for fuel (L J Walsh) 436
CRANE, H M, ON AERONAUTIC SAFETY
CODE 419
CRANE, H M, ON FUNDAMENTAL PRINCIP-
LES OF AUTOMOBILE HEADLIGHTING 559
CRANE, H M, ON POSSIBLE SOLUTION OF
THE HEADLIGHT PROBLEM 535, 536
Crankcase corrosion 517
Crankcase-oil specifications 33

Crankcase Oil Contamination

Collecting of winter oil-samples 547
Low temperature causes 266

Crankcase-Oil Dilution

Analysis of tests 60
Check tests 60
Effects of 60
Prevent, rather than cure 11
Reduction of, with steam cooling 330
Results of tests 59
Starting cold engine causes most 266
Steam cooling-system and 58
Crankcases, checking 335

Crankshafts

Aligning of 334
Checking 335
Critical tables, international 591
CROOKS, L E, ON TOXIC EFFECTS OF
MOTOR-VEHICLE EXHAUST 539
Crop area and farms in the United States 553
Cross-roads, obscure 83
Crosswalks and railroad crossings 84
Current generation automatically ad-
justed 77
Curves and hilltops in driving 81
Cushioning quality of tires, measuring 36
Cyanide hardening of gears 304
Cylinder and engine lubrication (A Lud-
low Clayton) 11, 58, 472
Cylinder-grinding machine corrects block
warpage 335
Cylinder-heads and blocks, inspection of 379

Cylinders

Grinding limits 336
Grinding-machine, heavy, corrects
block warpage 335
Lubrication 11, 58
Main and master pump 492
Methods of sizing and finishing 335
Refinishing of 334

D

Daily S A E, news in 28
DALTON, A C, ON FROM ARMY MULE TO
MOTOR TRUCK 530
Data Sheets, July issued 225
Day-by-day record of business in service-
stations 284
Delco equipment inspection 380
DENISON, A H, ON FUEL-CHARGE MIXING
AND FLAME PROPAGATION 273
Departmental management 350
"Depressed beam" standard needed 544
Designing die-castings 256
Designing with consideration for repair
men's tool equipment (D C Hinck-
ley) 516

Detonation

Cause of 275
Four-cycle engines 276
Most previous studies confined to phy-
sical phenomenon 277
Symptom of mixture condition 276
Where, occurs 556
Detroit's production 36
Development difficulties and the design
of hydraulic-brake units (H E May-
nard) 19, 231, 615
Development of a modern four-wheel me-
chanical braking-system (J R Caut-
ley and A Y Dodge) 18, 87, 470
Diagnosis of engine troubles and chassis
noises (J C Talcott) 518
DICKINSON, H C, ON WHAT IS SAFE
SPEED? 12, 81, 384

Die-Castings

Accuracy of 256
Alloys 255
Designing 256
Enameling 257
Limitations of 258
Machining 256
Methods 258
Non-ferrous metals 254
Plating 257
Polishing 257
Porosity of 255
Soldering 257
Die-castings made of non-ferrous metals
(Marc Stern) 254

Dies

Cast from models 452
Making 300
Pick-ups for the breakdowns, making 453

Diesel Engines

Automotive development 344
Growth in size 340
Heat-flow in large 342
High-speed injection 342
Recent developments 339
Special types embodying principle of 446
Differential carriers, inspection of 383
Diffused and non-symmetrical lighting
needed 562

Dinners

Aeronautic 421
Production 307

Direct Expenses

Allocation of 283
Explanation of accounts for 283

Disc Wheels

Adaptable to both solid and pneumatic
tires 538
Construction of 538
Distribution of automotive products
(Ray W Sherman) 167
Division of Simplified Practice in auto-
motive field 321
DODGE, A Y, ON DEVELOPMENT OF A
MODERN FOUR-WHEEL MECHANICAL
BRAKING-SYSTEM 18, 87, 470
Doors, interchangeability of 395
Doping and finishing airplanes 447
DOUGLAS, D W, ON PRESENT PHASE OF
COMMERCIAL AVIATION 430

Drilling-machine applications (R M Anderson)	307	Emergency-field layout and equipment	488	Some aspects of aircraft, development	496
Drilling of body bolt and engine bolt-holes	396	Emigration of skilled labor from Great Britain	61	Special types embodying Diesel principles	346
Drive-shaft and clutch need balancing	93	Enameling and plating die-castings	257	Specially designed for rail-cars, characteristics	78
Drivers		Engagement methods of clutches	363	Speeds of airplane	497
Labor turnover is reduced	166	Engine corrosion—its causes and avoidance (Frank Jardine)	517, 605	Starting cold, causes most dilution	266
Responsibility of	84	Engine Division, S A E		Starting time	55
Selective method of choosing, must become universal	166	Activities	150, 151, 319, 542, 543, 544	Steam cooling	327, 432
Tests to determine fitness	164	Personnel	106	Steam-cooling demonstration	11
Drives, comparative merits of different	75	Report at Semi-Annual Meeting	31	Superchargers for aircraft	440
Driving		Engine lubrication	248	Superchargers for airplane	502
Crosswalks and railroad crossings	84	Engine lubrication (T E Coleman)	535	Temperature	244
Curves and hilltops	81	Engine reconditioning—refinishing of cylinders and aligning of shafts (Robert C McWane)	334	Testing airplane	506
Enforcing the law	85	Engine-starting tests (J O Eisinger)	10, 52, 474	Throttling and choking	57
Look ahead, not behind	85	Engine temperature	244	Trunnions proposed	151
Motor vehicles in line	84	Engineer, technical society and	509	Use castor oil in stored cars	606
Night	84	Engineering, coordination of manufacturing and, in airplane construction	442	Valve gear of airplane	505
Obscure roads	83	Engineer's part in increasing highway safety (C F Kettering)	578	Where detonation occurs	556
Road crossings	82	Engines		Why cars lost power	552
Roadside obstructions	84	Air-cooled		Wright 12-cylinder	501
Simple rule becomes a simple law	85	Aircraft development	420, 430	Equalizers and linings discussed	20
Ductility tests and their significance	179	Design	398	Europe's policy and American lack of policy in aeronautics	450
Dust and metallic particles, effects of, on oil	267	Use of, in motor cars	503	EVANS, W F, ON SIX-WHEEL MOTORCOACH OPERATION	529, 620
Dynamics of the inner ear and auditory masking	116	Air-cooling for airplanes	502	Evolution of modern racing airplane (W L Gilmore)	420, 476
E		Aircraft		Exhaust, toxic effects of motor-vehicle	539
Ear		Development	420, 430	Exhibits at Semi-Annual Meeting	27
Auditory masking and dynamics of the inner	116	Laboratory inspection	316	Extension or closely coiled springs	198
Mechanism of human	115	Relation of, to specific needs of naval aviation	430	Extra-fine thread fits	33
Early Fifth Avenue motorbuses	96	Satisfactory light, requirements	440	Extra-fine thread fits applications	33
Earnings		Airplane		Eye-bolt stresses as determined by photoelastic test (Thomas H Frost and Lieut W E Richards)	213
Automobiles affect railroad	583	Generator problems	510	F	
Effect of motor-vehicle competition on railroad	522	Size and weight relation	439	Fabrication	
Earth-induction airplane compass	485	Size of	497	Shroud	394

INDEX TO VOLUME XVII

629

Foremen Training

- Feasibility of 351
 Manufacturing organization 302, 350
 Need for systematic 351
 Squad idea of development and pro-
 motion 352
 Text and lecture material 352
 Formulas, torsion the same for springs
 and rods 195

Four-Wheel Brakes

- Advantages of 90
 Development of modern mechanical
 system 18, 87, 470
 Ideal hook-up for 90
 Two-wheel versus 89
 France, prosperity of 209

Freight

- Collection and delivery service in Great
 Britain 524
 Containers, requirements for 526
 Coordination of railroad and motor
 truck in handling 607
 Freight at railroad terminals, handling 430
 Freight handling session at Automotive
 Transportation Meeting 524
 Freight traffic, railroad 591
 Friction drive 129

Friction Drive

- Adaptability to light cars 210
 Advantages of 211

Friction Facings

- Clutches 361
 Molded and woven, compared 362
 Two classes of 362
 Friction on unlubricated surfaces, laws
 of sliding 64
 Friction transmission for automobiles (C
 A Trask) 210
 Frictional action in spring-suspension 48
 FRITCH, H F, ON MOTORCOACH AND THE
 RAILROAD 522, 583
 Frontier facts in air transportation (J
 P Van Zandt) 354
 FROST, THOMAS H, ON EYE-BOLT
 STRESSES AS DETERMINED BY PHOTO-
 ELASTIC TEST 213

Frosted Bulbs

- Inadequate under difficult conditions 571
 Light distribution from 565
 Test of illumination from 564
 Fuel-charge mixing and flame propa-
 gation (A H Denison) 273

Fuel Consumption

- Kilowatt-hour related to 594
 Satisfactory with gasoline-electric
 motorcoaches 595
 Fuel from the service standpoint (T A
 Boyd) 520

Fuels

- Charge mixing and flame propagation 273
 Cracking of oil for 436
 Distribution of mixture 55
 From the service standpoint 520
 Lift of 56
 Motor 436
 Practical results sought 274
 Research to determine needs 416
 Saw-tooth effect of expansion curve of
 manographic cards 274
 Subsidiary problems develop in research 548
 Sulphur and water found 517
 Uniformity of composition essential 277
 Used without preheating 274
 Volatility 57
 Fundamental demonstration of cooling
 by steam (H L Horning) 11, 292
 Fundamental principles of automobile
 headlighting (H M Crane) 559
 Fundamental requirements for commer-
 cial aviation (W B Stout) 422, 455
 Fundamentals of brake design (Otto M
 Burkhardt) 18, 64, 462
 Fuse-clip radii specified 543

Fuselage

- Doping and finishing 447
 Final assembly 447

G

- Gases, ignition of 397

Gasoline

- Changes in quality since 1915 416
 Consumption has been satisfactory
 with gasoline-electric motorcoaches 595
 Figures for individual cities give truer
 picture 417
 Natural-gas 509
 Volatility, study of the variations in 416
 World trade in 408

Gasoline-Electric Motorcoaches

- Accident claims greatly reduced 593
 Cost of operation reduced by smooth,
 rapid acceleration 593
 Gasoline consumption has been satis-
 factory 595
 Kilowatt-hour related to fuel consump-
 tion 594
 Offers more attractive ride to sell 593
 Operating experience with 592
 Quietness stills residents' complaints 593
 Regular maintenance cut in half 594
 Smooth, rapid acceleration reduces cost 593
 Troubles that have been overcome 595
 Unusual conditions met at outset 595
 Usual number of minor troubles 596
 Gasoline-electric bus and rail-car ses-
 sion at Semi-Annual Meeting 13
 Gear calculations and gear tests 35
 Gear case may be an amplifier 63
 Gear ratios that give harmonious sounds 62
 Gearing efficiency of spur 418

Gears

- Analysis of the product 373
 Calculations and tests 35
 Characteristic sounds and their causes 62
 Conclusions on durability 418
 Conclusions on efficiency, considering
 tooth friction only 418
 Coordinated activities in tooth grind-
 ing 374
 Coordinating design and production
 methods 304, 372
 Cyanide hardening 304
 Efficiency and durability of 417
 Efforts toward coordination 373
 Excess lubrication causes heating 63
 Field for investigation 548
 Form-wheel type of grinding machine 375
 Future development 326
 Means of production 325
 Optimum reduction ratio 128
 Problem of production 305, 325
 Refinement of methods 326
 Strength determinations and calcula-
 tions 418
 Transmission counter three, forging 382
 Troubles and some suggested reme-
 dies 304
 GEISSE, J H, ON PROBLEMS ENCOUN-
 TERED IN TESTING AIRCRAFT EN-
 GINES 316
 Generator-problems, airplane-engine 510
 Generators, special, required for motor-
 coach 541
 GILBRETH, LILLIAN M, ON TRAINING EM-
 PLOYEES IN PRODUCTION WORK 301, 399
 GILMORE, W L, ON EVOLUTION OF THE
 MODERN RACING AIRPLANE 420, 476
 Glass, head-lamp, diameters 542
 Glasses as undercooled liquids 188
 GLEASON, HENRY, ON MECHANICAL TRAF-
 FIC CONTROL 532
 Gold Cup motorboat races 224
 Gold, world's stock of monetary 216
 Government purchasing policy 619

Governors

- Centrifugal 269
 Good, characteristics of 269
 Internal-combustion-engine, character-
 istics of 269
 Vacuum-type 269
 Velocity 269
 GOW, W G, ON OPERATION AND ADVAN-
 TAGES OF THE PIECEWORK AUTOMO-
 BILE SERVICE-SYSTEM 161
 Grade-crossing accidents 581

Great Britain

- Emigration of skilled labor from 61
 Freight collection and delivery in 524
 Grinding machines, form-wheel type of 375
 Grinding-wheels, safety 483
 GROVES, W B, ON SHOCK-ABSORBER AND
 SNUBBER-DEVICE DEVELOPMENTS 293
 GUERNSEY, C O, ON REQUIREMENTS IN
 GASOLINE RAIL-CAR DESIGN 13, 74, 609
 Gyroscopic principle, use of, in transmis-
 sions 141

H

- HALE, J E, ON BALLOON TIRES FOR HEAVY
 VEHICLES 537

- Hammers made safe 309
 Handling freight at railroad terminals
 (Major Elihu Church) 430
 Hardness tests 378

Hardness Tests

- Advantages of 181
 With triangular point 180
 Harvesting in hilly country 250
 Head-lamp glass diameters 542

Head Lamps

- Better required 34
 Bibliography 156
 "Depressed beam" standard needed 544
 Depression in road, effect of 571
 Enforcement of laws difficult because
 of poor equipment 575
 Frosted bulbs 564, 565
 Frosted bulbs inadequate under diffi-
 cult conditions 571
 Illumination between car and object 565
 Illumination specified 225
 Lessening of glare by colored shields 570
 Motor-vehicle 155
 Need of further study 567
 Pair of windings gives three positions
 of bulb 574
 Present laws should be explained and
 enforced 575
 Present situation 156
 Research should be continued 574
 Set too high 564
 Sharp cut-off above horizontal 565
 Tilted any desired degree 564
 Tilting 568

Headlighting

- Bright areas within field of vision 570
 British specifications, basis of 566
 Field for investigations 548
 Fundamental principles of automobile
 illumination conforming to the Society's
 specification 569
 Improvements in 571
 Interference possible under best con-
 ditions 571
 Invariable and asymmetrical 569
 Non-symmetrical 565
 Photometric calculations apply to ex-
 ceptional cases 570
 Regulating versus diffusing system 576
 Royal Automobile Club
 Chart objectionable as basis of speci-
 fications 566
 Tests 567
 Symposium, automobile 559
 Visibility tests 567

Headlights

- Beam of high intensity in foreground 562
 Control of concentrated beam 560
 Courtesy lights 563
 Diffused and non-symmetrical lighting 562
 Driving through a tunnel 573
 Illumination at point B 561
 Inadequate 579
 Making changes in laws, effect of 577
 Narrow crowned roads, effect of 561
 Origin and limitations of regulations 560
 Possible solution of the problem 535, 536
 Remedy lies in good, with deflecting
 beam 576
 Research needed 561
 Specifications for 572
 Variations of road contour, effect of 560
 Headlights (J H Hunt) 563
 Hearing, mechanism of human 115

Heat

- Frictional, generation of 208
 Generation of, in oil-film 208
 Oxygen and, cause chemical changes
 in oils 265
 Heat-flow in large-engine design 342
 Heat generation in oil-film 208
 Heating, excess lubrication causes 63
 HELDT, P M, ON SOME RECENT WORK ON
 UNCONVENTIONAL TRANSMISSIONS
 20, 127, 613
 HERON, S D, ON AIR-COOLED AIRCRAFT
 ENGINE DEVELOPMENT 398
 HERRSHOFF, ALEXANDER, ON STEAM
 COOLING 327
 HERRINGTON, A W S, ON MOTOR TRAN-
 PORTATION AS A PASSENGER-CARRYING
 AGENCY 125, 157
 HIDEY, R M, ON MACHINE-TOOL NEEDS OF
 THE AUTOMOTIVE INDUSTRY 305, 359
 High-speed injection-engines 342
 High-speed thoroughfares advocated 12
 Highway Research Board 608
 Highway safety factors (A B Barber) 11
 Highway safety session at Semi-Annual
 Meeting 11

Highways and Roads

- Asphaltic concrete 536
- Automobile design and construction features as elements in safety 12
- British to conduct research 510
- Construction and destruction 536
- Crossings 82
- Curves and hilltops 81
- Defining rights-of-way 581
- Depression affects headlamps 571
- Engineer's part in increasing safety 578
- Future development 432
- High-speed thoroughfares advocated 12
- Narrow crowned, affect headlamps 561
- Obscure cross 83
- Railroad crossings 84
- Regulation of traffic 533
- Roadside obstructions 84
- Safety factors 11
- Saturation point for motor vehicles a question of space 125
- Space as a saturation-point determinant for motor vehicles 157
- Speed of motor vehicles 602
- Unevenness of, and spring deflection 155
- Uniform system of signs 267
- Variable effect of profile 43
- Variations of contour in, affect headlight beam 560
- What the automotive engineer can do to make safe 11

Highways Committee, S A E

- Activities 547
- Report at Semi-Annual Meeting 8
- HINCKLEY, D C, ON DESIGNING WITH CONSIDERATION FOR REPAIR MEN'S TOOL EQUIPMENT 516
- History of automotive-clutch development (E E Wemp) 361
- HOFFMAN, A H, ON BEST LOCATION FOR CARBURETOR INTAKE 172
- Holding power of wood screws 414
- HORNING, H L, demonstration of steam-cooling of engine 11
- HORNING, H L, ON BEARING OF RESEARCH DEPARTMENT WORK ON CAR DEVELOPMENTS 189
- HORNING, H L, ON FUNDAMENTAL DEMONSTRATION OF COOLING BY STEAM 11, 292
- HORTON, R H, ON OPERATING EXPERIENCE WITH GASOLINE-ELECTRIC MOTORCOACHES 529, 592
- Horsepower and acceleration of motor vehicles increased 579

Hot Stampings

- Dies are cast from models 452
- Pick-ups for the breakdowns, making quality results from long experience 454
- HOT STAMPINGS AND THEIR PRODUCTION (G F KEYES) 299, 452
- How it feels to fall 1500 ft. 106
- Howard inertia transmission 139
- HOWARTH, H A, ON LUBRICATION OF PLAIN BEARINGS 537
- HUCK, LOUIS C, ON BRAKES FOR HEAVY VEHICLES 538
- Human elements in production 495
- Human eye 566
- Human hearing, mechanism of 115
- HUNT, J H, ON HEADLIGHTS 563
- HUNT, O E, ON SMALL CAR 428

Hydraulic-Brake System

- Development difficulties and the design of units 231, 615
- Equalized pressure gives maximum safe breaking-effect 235
- Flexible leads, development of 233
- Long search for suitable liquid 234
- Major elements of 232
- Neutralized castor oil and alcohol adopted 235
- Perfecting by careful study 233
- Piston cup, how developed 234
- Rubber piston cups finally solve the problem 234
- Sliding connection with pedal lever 232
- Hydraulic-drag transmission 130

Hydraulic Steering

- How accomplished 492
- Main cylinder 492
- Master pump 492
- Hydraulic transmissions 131

Hydraulic Transmissions

- Advantages and disadvantages of automatically variable type 133
- Control and operation 32
- Description of 614

Hydroplanes

- Principle, application of, to motorboats 224
- Speedier and safer than motorboats 230

I

- Idle-time control-method in service-stations 284
- Ignition of gases 397

Illumination

- Conforming to the Society's specification 569
- Elements of satisfactory 155
- Mathematical expression of 155
- Immigration law, effects of 114
- Impact of laws 36
- Improvements in headlighting (R N Falge) 571

Income

- American farmers 262
- Doubled with 74 per cent fewer men in piecework service system 162
- Price-level and 162
- Industrial flying 114

Inertia-Type Transmissions

- Characteristics 139
- Description 138
- Howard 139

Inspection

- Aircraft engine laboratory 316
- Airplane industry 311
- Airplane, some aspects 441
- Aspects in airplane industry 311
- Assembling line 381
- Brake-drums 384
- Cylinder-heads and blocks 379
- Delco equipment 380
- Differential carriers 383

- Keyways, effect of, on strength of shafts 286
- KRANICH, F N G, ON POWER TAKE-OFF FOR TRACTORS 249
- KREUSSER, O T, ON TESTING APPARATUS AND METHODS USED IN CONDUCTING MOTOR-VEHICLE TESTS 429

L**Labor**

- Emigration from Great Britain of skilled 61
- Turnover reduced by driver fitness tests 166
- Lamp glasses need simplification 150
- Lamp mountings, motorcoach 31
- Landing gear of airplanes 477
- Latin-American trade 201
- Lavaud transmission 133
- Lawrance nine-cylinder engine 504

Laws

- Effect of making changes in headlight enforcing 577
- Fundamental business, cannot be ignored 85
- Impact of 168
- Should be explained and enforced 36
- Simple rule becomes a simple 575
- Standardization of motor-vehicle 85
- Uniform and model motor-vehicle, differences 597
- Uniformity needed in speed 268
- Laws of sliding friction on unlubricated surfaces 64

Leather

- Patching of 543
- Upholstery, substitutes, tests of 545
- Length of haul by motor truck 211
- LEPAGE, W L, ON LIGHT AIRPLANE AND LOW-POWERED FLYING 420, 437
- Lessening of glare by colored shields (J W Lord) 570
- Lever and ball-nut assembly in brake-control system 88
- LEWIS, HAROLD M, ON TRAFFIC CONGESTION AND PLANS FOR RELIEVING IT 430
- Liability costs, lower with six-wheel motorcoaches 621
- Liberty engine 500
- Light airplane and low-powered flying (W L LePage) 420, 437

Lighting Division, S A E

- Activities 34, 151, 225, 542, 544
- Personnel 475
- Report at Semi-Annual Meeting 31
- Lighting laws compiled, motor-vehicle 319
- Limitations of die-castings 258
- Limits for clutch discs 31
- LINFORTH, J, ON BALLOON TIRES FOR MOTORCOACHES 538
- Liquid for hydraulic brakes, long search for suitable 234
- Liquids, glasses as undercooled 188
- Loading and overloading of motor vehicles 599
- LOCKWOOD, E H, ON REAR-WHEEL TESTS OF 100 AUTOMOBILES 539
- Long-distance touring in automobiles 228
- LONG, JOHN C, ON NATIONAL CONTROL OF TRAFFIC 430
- Look ahead, not behind, in driving 85
- LORD, G F, ON AUTOMOTIVE TRANSPORTATION PREVENTIVE SERVICE 515
- LORD, J W, ON LESSENING OF GLARE BY COLORED SHIELDS 570

Loudness

- Complex sounds 118
- Four principle methods of measuring noise 123
- Indicators 122
- Loudness-measuring methods, other 123
- Low temperature causes contamination of oil by water 266
- LOWE, EDWARD F, ON CHARACTERISTICS OF THE INTERNAL-COMBUSTION-ENGINE GOVERNOR 268

Lubricants

- Abrasion 288
- Amount and character of 289
- Carbon formed by decomposition 266
- Control of oil-flow past the pistons 264
- Dust and metallic particles, effects of 267
- Engine operation, effect on oil 263

INDEX TO VOLUME XVII

631

Lubricants (Concluded)

- Excess oil exposed to burning gases 264
 Exposure time a factor in consumption 264
 Five impurities that contaminate 264
 Flash-test of volatility may mislead 264
 Low temperature causes contamination by water 266
 Machine for comparing properties of oils at high pressures 287
 Oil destroyed by burning, not wear 283
 Oxygen and heat cause chemical changes 265
 Permanent viscosity changes, causes of 265
 Physical changes and their causes 265
 Pressure, velocity and temperature effects 289
 Starting cold engine causes most dilution 266
 Tests of bearing 288

Lubricants Division, S A E

- Activities 33
 Personnel 475

Lubrication

- Cylinder and engine 11, 58, 472
 Engine 248, 535
 Engines with mud 190
 Excess causes heating 63
 Mechanism of 539
 Plain bearings 537
 Rules for bearing 527
 Lubrication of plain bearings (D P Barnard, 4th, and H A Howarth) 537
 Lubrication session at Semi-Annual Meeting 9
 LYBECK, R J, ON MOTOR FUEL 436

M

INDEX TO VOLUME XVII

633

Production Meeting, S A E (Concluded)					
Reduced railroad fares	221	Striping for automobiles	247	Road construction and destruction (J F Jellick)	536
Reviewed	229	Regulating versus diffusing headlighting system	575		
Technical sessions announced	221	Regulation of traffic on highways (William H Marsh)	533	Roads and Highways	
Production men to inspectors, ratio	311	Relations of aircraft engines to the specific needs of naval aviation (Lieut Hugo Schmidt)	430	Asphaltic concrete	536
Productive-hour chart, what it tells	285	Release-sleeve designs, improvements in	366	British to conduct research	510
Products and by-products of foremen's conferences (F T Jones)	302	Reliability as a factor in air-transportation efficiency (J Parker Van Zandt)	423, 433	Construction and destruction	536
Profits, calculation of gross and net, for service-stations	282	Repair men's tool equipment, designing with consideration for	516	Crossings	82
Program of Production Meeting	222			Curves and hilltops	81
Progressive maintenance (Fred M. Sharp)	278	Repair Shop		Defining rights-of-way	581
Proofs of the value of driver fitness tests	165	Advantages of apprenticeship system	204	Depression in, affects head-lamps	571
Prosperity of France	209	Branch schools	203	Engineer's part in increasing safety	578
Psychology of service	550	Course of training	203	Future development	432
Publication Committee, S A E, report at Semi-Annual Meeting	8	Personnel, training	202	Narrow crowned, affect headlights	561
Pull-type versus push-type control for clutches	366	Selection of applicants	204	Obscure cross	83
Pumps, master	492	Specific instruction needed	203	Railroad crossings	84
Purchasing policy, Government	619	Training personnel	202	Regulation of traffic	533
Push-type versus pull-type control for clutches	366			Roadside obstructions	84
				Safety factors	11
Pyroxylin Enamel				Saturation point for motor vehicles a question of space	125
Air-dries quickly, leaving a hard, tough, durable film	186	Reports		Space as a saturation-point determinant for motor vehicles	157
Application and refinishing	245	Highways Committee at Semi-Annual Meeting	8	Speed of motor vehicles	602
Complexity of cellulose-nitrate finish	187	Machine-tool maintenance	310	Unevenness of, and spring deflection	155
Finish failures overcome with Refinishing practice	245	Meetings Committee at Semi-Annual Meeting	6	Uniform system of signs	267
Pyroxylin refinishing-practice (J J Riley)	245	Membership Committee at Semi-Annual Meeting	5	Variable effect of profile	43
		Publication Committee at Semi-Annual Meeting	8	Variations of contour in, affect headlight beam	560
Q		Research Committee at Semi-Annual Meeting	7	What automotive engineer can do to make safe	11
Qualifications of apprentices for repair shop mechanics	204	Sections Committee at Semi-Annual Meeting	7	Roadside obstructions	84
		Standards Committee at Semi-Annual Meeting	6	Rods, torsion formulas the same for springs and	195
R		Treasurer's	30	Rolling-resistance of motor vehicles	229
R 38 Memorial Prize	349	Requirements in gasoline rail-car design (C O Guernsey)	13, 74, 609	Ross, C J, ON INSPECTION METHODS	311, 376
Radial type of engine	504	Research	36	Rotary distributing-system	506
Radio for aerial navigation and military purposes, use of	430			Royal Automobile Club chart objectionable as basis of headlighting specifications	566
		Research		Rubber piston cup in hydraulic-brake system	234
Rail-Cars		British to conduct highway	510	Running gear, refinishing	246
Comparative merits of different drives	75	Commodity	493	RUTHENBURG, LOUIS, ON TRAINING THE FOREMEN OF A MANUFACTURING ORGANIZATION	302, 350
Current generation automatically adjusted	77	Cooperative	558	RYAN, W D A, ON SPECIFICATIONS FOR HEADLIGHTS	572
Design and work capacity of largest mechanically-driven	77	Fuel needs to be determined	416		
Distinct fields for both types	610	Further headlight, needed	562	S A E	
Employees accustomed to electrical equipment	612	Oil engine needs	216	Aeronautic Meeting, reviewed	419
Field and market	86	Problem solved by, of 1802	191	Automotive Transportation Meeting reviewed	521
Mechanical drive 90 per cent efficient	610	Subsidiary problems develop in fuel	548	Council Meetings	
Operating economy compared with steam train	80	Survey of industrial, to be conducted	548	June	106
Reliability is most important	610			October	475
Replace light steam-trains	611	Research Committee, S A E		November	619
Requirements in gasoline, design 13, 74, 609	609	Activities for winter	546	Exhibit attracts attention	27
Service conditions and design requirements	75	Meeting at Semi-Annual Meeting	14	Motorboat Meeting reviewed	223
Special clutch is of sturdy design	78	Report at Semi-Annual Meeting	7	Officers nominated for 1926	21
Specially-designed engine, characteristics of	78			Production Meeting reviewed	299
Transition from motor-truck type	74	Research Department		Semi-Annual Meeting reviewed	3
Wearing parts concentrated in removable units	79	Bearing of work on car developments	139	Service Engineering Meeting reviewed	515
Railroad freight traffic	591	Program outlined for coming winter	546	S A E HANDBOOK, data sheets for July issued	225
Railroad type of brake	72	Undertaking serious work	191		
		Responsibility of the driver	84	Safety	
Railroads		RICHARDS, LIEUT W E, ON EYE-BOLT STRESSES AS DETERMINED BY PHOTO-ELASTIC TEST	213	Airways possible at low cost	489
Airplanes more reliable than	435	Riding-comfort, accelerometer gives only relative idea of	38	Automobile design and construction features as elements in highway	12
Automobile affects earnings	583			Automotive plants, measures in	480
Coordination of motor truck and, in freight handling	607	Riding-Qualities		Driving rule discussed	384
Crossings	84	Basis for appraisal of discomfort	37	Education and law enforcement urged	12
Freight traffic	591	Clutch and drive-shaft need balancing	93	Effectiveness of, measures	480
Grade-crossing accidents	581	Displacement characteristics	110	Engineer's part in increasing highway	578
Motorcoach and the	583	Displacement-time curve	110	Equalized pressure of hydraulic brakes gives maximum	235
Motor truck and, coordination will establish economic transportation	608	Displacements determine	16	Factor of public opinion	13
On-time records of passenger trains	434	Excessive vibration, effects of	92	Grinding-wheels	483
Operation of motor-vehicle service and	584	High price of acceleration	94	Hammers	309
Place of the	584	Horizontal displacements comparatively small	108	Highway, factors	11
Problem of branch line	584	Impressions both physical and mental	92	Inauguration of campaigns	479
Rail-cars replace light steam-trains	611	Investigation confined to definite conditions	109	Machine-tool guards	303, 479
Revenues, effect of motor-vehicle competition on	522	Mind becomes obsessed by a fault	91	Machine-tools	318
Ratchet drive transmission	135	Motor vehicles	16, 107	Motor-vehicle brake code	484
Rear-wheel tests of 100 automobiles (E H Lockwood)	540	Motor vehicles with multiple wheels	239	Shock-tools	483
Recent Diesel-engine developments (Philip L Scott)	339	Recently developed improvements	94	Woodworking tools	
Reduced railroad fares at Production Meeting	221	Remediable faults in cars, some	92	Saw-tooth effect of expansion curve of manographic cards	274
Reduction of automobile accidents by use of psychological tests (A J Snow)	13, 163	Synchronous vibration of parts	93	SCHLINK, F J, ON CLASSIFICATION OF ENGINEERING AND INDUSTRIAL STANDARDS	414
		Vibrations of 0.001 in. are tiresome	190	SCHMIDT, LIEUT HUGO, ON RELATIONS OF AIRCRAFT ENGINES TO THE SPECIFIC NEEDS OF NAVAL AVIATION	430
Refinishing		Riding-qualities of motor vehicles (R W Brown)	16, 107	School of sincerity	277
Moldings	246	Riding-qualities session at Semi-Annual Meeting	16	Schools for training repair shop mechanics	203
Pyroxylin practice	245	Rights-of-way, defining	581	Scientific and Engineering Symbols and Abbreviations Sectional Committee, personnel	475
Running gear	246	RILEY, J J, ON PYROXYLIN REFINISHING-PRACTICE	245	SCOTT, JOSEPH L, ON COORDINATION OF RAILROAD AND MOTOR TRUCK IN FREIGHT HANDLING	524, 607
				SCOTT, PHILIP L, ON RECENT DIESEL-ENGINE DEVELOPMENTS	339
				Scrap, conservation of	390

Special accessory "game" 557
Specific instruction needed 203
Taking the owner's statement 552
Training repair shop personnel 202
Use and value of owners' register 285
Value of experience 202
Where the trouble lay 554
Work guaranteed by shop and men 162

Service Engineering Meeting, S A E

- Announced 149, 223, 316
Corrosion session 517
Engine and car troubles session 424
Engine corrosion session 424
Fuels session 425
Program 424
Reviewed 515
Sessions announced 424
Trouble diagnosis session 518

Service-Stations

- Budget system, application of 281
Budget system as an aid to management 280

- Calculating gross and net profit 282
Day-by-day record of business 284
Direct expenses and their allocation 283
Explanation of direct-expense accounts 283
Fair profit can be realized 281
How budget system is prepared 281
Idle-time control-method 284
Methods used in operating a budget 283
Use and value of owners' register 285
What the productive-hour chart tells 285

Service System

- How piecework works 161
Income doubled with 74 per cent fewer men in piecework 162
Operation and advantages of the piecework automobile 161
Shafts, effect of keyways on strength of 286
SHARP, FRED M, ON PROGRESSIVE MAINTENANCE 278

Sheet Steel

- Back panel 394
Conservation of scrap 390
Cost of finished parts 392
Economy the watchword 301
Erichsen tests 290
Fabrication 301, 389
Fabrication of shroud 394
Hot stamping 299
Method of taking samples 290
Ratio of yield-point to ultimate tensile-strength 291
Results of insufficient annealing 290
Testing of 290
Sheet steel fabrication (Syd Smith) 301, 389
Sheet-steel tests 413
SHERMAN, RAY W, ON DISTRIBUTION OF AUTOMOTIVE PRODUCTS 167
Shock-absorber and snubber-device developments (W B Groves) 293

Shock-Absorbers

- Coordinating, with the spring 49
Snubber-device and, developments 293
Shock-tools, safety of 484
Shimmy 491
Front and rear end differences that cause 491
Prevention of, by hydraulic steering-control 490
Side-rails, fabrication of 396
Significance of common physical properties of structural materials (F H Moore) 175
Signs, uniform system of road 267
Sincerity, school of 277
Single or multi-purpose machines 359
Six-wheel motorcoach operation (W F Evans) 529, 620

Six-Wheel Motorcoaches

- Lower maintenance and liability costs 621
More brake area—less spring deflection 621
Operation 620
Principle regarded as logical 620
Sliding-gear transmission, pros and cons of 127
Small car (O E Hunt) 428
SMITH, SYD, ON SHEET STEEL FABRICATION 301, 389
SNOOK, H C, ON AUTOMOBILE-NOISE MEASUREMENT 4, 115, 617
SNOW, A J, ON REDUCTION OF AUTOMOBILE ACCIDENTS BY USE OF PSYCHOLOGICAL TESTS 13, 163
Snubber-device and shock-absorber developments 293
Soldering die-castings 257
Solid tires, disc wheels adaptable to pneumatic and 538
Some aspects of aircraft-engine development (G J Mead) 420, 496
Some aspects of airplane inspection (J J Feeley) 311, 441
Some recent work on unconventional transmissions (P M Heldt) 20, 127, 613

Sounds

- Characteristic, and their causes 62
Gear case may be an amplifier 63
Gear ratios that give harmonious 62
Loudness of complex 118
Physiological effect of 4
Propagation of 119
Radiating surfaces 120
Velocity in chassis 4
Volume within the speech range 117

Spark-Plugs

- Wrong, cause trouble 554
Standard revised 542
Spark test 378
Special car requirements of the Orient 540

Specifications

- British headlighting, basis of 566
Crankcase oil 33
Headlights 572
Illumination conforming to the Society's 569
Motorcoach 31
National directory of 321
Royal Automobile Club chart objectionable as basis of headlighting 566
Standard, too indefinite 181
Specifications for headlights (W D'A Ryan) 572
Specifications for Zinc Coating of Iron and Steel Sectional Committee, personnel 619

Speeds

- Airplane 497
Average motor vehicle 603
Formula for safe 86
Motor vehicle 602
Uniformity needed in laws governing 268
What is safe 12, 81, 384
Spring deflection and unevenness of road 155

Spring-Suspension

- Elementary dynamics of vehicle 17, 37
Frictional action in 48
How might be improved 47

Springs

- Action of a two, suspension system 46
Analysis of single, action 40
Auxiliary, effect of 45
Calculation and design of coiled 195
Causes and effects of, action 38
Chassis, test 384
Condition of surface and fatigue resistance 200
Conical, a cure for valve-spring breakage 198
Coordinating the shock-absorber with 49
Deflection and unevenness of road 155
Extension or closely coiled 197
Flexible front, reduce pitching 46
Inspection 378
Less deflection with six-wheel motorcoaches 621
Method of computing deflection 50
Motorcoach 590
Range of stress important 199
Shock-absorber and snubber-device development 293
Square material 197
Tolerances 200
Torsion 198
Torsion formulas the same for rods and 195
Use of alloy-steels 200
Variable effect of road profile 43
What more-flexible front, entail 48
Squad idea of foreman development and promotion 352
SQUIRES, JOHN, ON MANUFACTURER'S REFLECTIONS ON THE AUTOMOTIVE SERVICE FIELD 519, 549
Standard versus special machine-tools 306
Standardization 126

Standardization

- American Society for Testing Materials book of standards, supplement to 322
Army-Navy conference 227
Cooperation in 321
Electrical power and farm equipment 622
International 508
Jigs and fixtures 308
Machine-tool parts 360
Manufacture and equipment of motor vehicles 599
Manufacturer's attitude toward 522
Motorboat needed 223
Motorcoach bodies 591
Motor-vehicle law 597
Plow bolts, proposed 226
Possibilities of motorcoach 590
Savings in first cost and maintenance result from 524
Scope of, and simplification 415
Standardization session at Automotive Transportation Meeting 522

Standards

- Approved by letter-ballot 226
Army-Navy 30
Bolt, to be revised 151
Brake-lining, extended 413

INDEX TO VOLUME XVII

635

- Classification by use 415
 Classification of 414
 Classified and defined 414
 Control-lever ball-handle inserts not used 414
- Standards Committee, S A E**
 Activity 321, 544
 Attendance at Semi-Annual Meeting 33
 Report at Semi-Annual Meeting 6, 30
 Starting-motor mountings for motor-coach, special, required 541
 Starting time of engine 55
 Status of the farmer 149
- Steam-Cooling**
 Crankcase-oil dilution reduced by 330
 Effectiveness 329
 Fundamental demonstration of engine 11, 292
 Working model of system 328
 Steam-cooling (A Ludlow Clayden) 432
 Steam-cooling (Alexander Herreshoff) 327
 Steam-cooling of engine, demonstration by H L Horning 11
- Steam Cooling-System**
 Crankcase-oil dilution and, study 58
 Test results 59
 Steam-heated body 330
 Steam train, operating economy of rail-cars compared with 80
 Steel exposition, National, at Production Meeting 149, 221, 313
 Steel flywheel rings test 384
- Steel**
 Hardness tests with triangular point 180
 Impurities in 212
 Molybdenum 31
 Test results with case-hardened 180
 Steering and braking of multi-wheel motor vehicles 238
 Steering-control, prevention of shimmy by hydraulic 490
- Steering**
 Braking and 522
 Hydraulic, how accomplished 492
 Steering-knuckles, inspection of 383
 Steering-linkage layout, determining 47
 STERN, MARC, ON DIE-CASTINGS MADE OF NON-FERROUS METALS 254
 STEWART, E W, ON CALCULATION AND DESIGN OF COILED SPRINGS 195
 STOECKEL, ROBBINS B, ON PROBLEMS OF MOTOR-VEHICLE ADMINISTRATION BY STATES 522, 597
 Stopping-distance of an automobile, factors determining the minimum 192
- Storage-Batteries**
 Modified form of drive with, for motor-buses 98
 Motorcoach simplified 541
 Ratings and capacities 33
- Storage-Battery Division, S A E**
 Activities 322, 541
 Personnel 106, 475
 Report at Semi-Annual Meeting 33
 STOUT, W B, ON AERIAL TRANSPORTATION 533
 STOUT, W B, ON FUNDAMENTAL REQUIREMENTS FOR COMMERCIAL AVIATION 422, 455
 Street-car type of motorcoach 588
 Street cars versus motorcoaches 159
- Stresses**
 Eye-bolt as determined by photo-elastic test 213
 Range in springs important 199
 Results of tests 215
 Test was made, how 214
 Stripping for automobiles 247
- Structural Materials**
 Ball-impression hardness-tests 177
 Compressive-strength 177
 Ductility tests and their significance 179
 Elastic-limit and yield-point 176
 Elastic-limit in shear and shearing-strength 177
 "Fatigue"-test results 178
 Repeated-impact tests, results from 179
 Significance of common physical properties 175
 Tensile-strength 176
 Structural requirements of airplanes 442
 Structure of copper crystals 286
- Superchargers**
 Aircraft engine 440
 Airplane engine 502
 Super-conducting copper 286
 Supplement to book of American Society for Testing Materials standards 322
- Surfaces**
 Cleanliness 212
 Condition of spring, and fatigue resistance 200
 Seams caused by trapped air 212
 Subsequent ill-treatment 212
- T**
 Tables, international critical 591
 TALCOTT, J C, ON DIAGNOSIS OF ENGINE TROUBLES AND CHASSIS NOISES 518
 Tanks to be regulated, truck 267
 Taxation, motor vehicle 599
 Tax monies, proper utilization of 160
 Taximeters, tentative code for testing 154
- Teaching Employees**
 Factors of 401
 How it should be done 406
 Results 407
 When it is to be done 405
 Where it is to be done 406
 Who is to do 303, 404
 Why it is to be done 407
 Technical sessions at Production Meeting 221
 Technical society and the engineer 509
- Temperature**
 Engine 244
 Low, causes contamination of oil by water 266
 Lubricant, effect of, on 289
 TEMPLIN, E W, ON MANUFACTURER'S ATTITUDE TOWARD STANDARDIZATION 522
 TENNEY, PERRY L, ON COORDINATING GEAR DESIGN AND PRODUCTION METHODS 304, 372
 Tensile-strength 176
 Tensile-strength, ratio to yield-point of sheet steel 291
 Tentative code for testing taximeters 154
 Test-results from repeated-impact tests 179
 Testing apparatus and methods used in conducting motor vehicle tests (O T Kreusser) 429
 Testing of automotive equipment at Ordnance Proving Ground (Capt J K Christmas) 534
 Testing of sheet steel (E F Collins) 290
- Tests**
 Advantages of hardness 181
 Airplane engine 506
 Automobile, for the public 520
 Ball-impression hardness 177
 Black baking-enamel on passenger-car bodies 541
 Bureau of Public Roads impact 110
 Case-hardened steel, results with 180
 Chassis springs 384
 Corona cable 150
 Crankcase-oil dilution 60
 Analysis of 60
 Check 60
 Result of 59
 Ductility, and their significance 179
 During production of automobile parts 378
 Engine-starting 10, 52, 474
 Erichsen, of sheet steel 290
 Eye-bolt stresses as determined by photoelastic 213
 Final, and results of, airplanes 489
 Flash, of volatility of oil may mislead 264
 Fundamental demonstration of cooling engine by steam 11, 292
 Gear calculations and 35
 Hardness 378
 Hardness, with triangular point 180
 Holding power of wood screws 414
 How photoelastic, were made 214
 Labor turnover reduced by driver fitness 166
 Lubricating oils in bearings 288
 Machine for comparing lubricating properties of oils under high pressures 287
 Method of taking samples of sheet steel 290
 Motor-vehicle road 429
 Notched-bar for metals 178
 Oil-flow, methods used in 206
 Photoelastic, of stresses, results of 215
 Physical may become a fetish 181
 Procedure of engine-starting 53
 Proofs of the value of driver fitness 165
 Rear-wheel, of 100 automobiles 540
 Reduction of automobile accidents by use of psychological 13, 163
 Repeated-impact, results from 179
- Results of "fatigue" 178
 Royal Automobile Club headlighting 567
 Sheet-steel 290, 413
 Spark 378
 Steam cooling-system, results 59
 Steel flywheel rings 384
 Taximeters, tentative code for 154
 Tire and truck impact 35
 To determine driver fitness 164
 Universal-joint yokes 383
 Upholstery leather substitutes 545
 Visibility of headlighting 567
- Text and lecture material for foremen training 352
 THALNER, R F, ON MAKING MACHINE-TOOLS SAFE 308, 479
- Thermal Efficiency**
 Clutches 364
 Problem of clutch 364
 THORNE, M A, ON NOTES ON CRANKCASE CORROSION 517
 Threads, throttle-lever 31
 Three-shoe self-energizing brake, features of 88
 Throttle-lever threads 31
 Throttling and choking of engine 57
 Thrust ball-bearings, clutch type 31
 Tire and truck impact tests 35
- Tires**
 Balloon for heavy vehicles 537
 Disc wheels adaptable to solid and pneumatic 538
 Impact tests 35
 Investigation of wear 228
 Measuring cushioning quality 36
 Objections to dual pneumatic 620
 Tolerances, spring 200
 Tooth grinding, coordinated activities in 374
 Torsion formulas the same for springs and rods 195
 Torsion springs 198
 Touring, long-distance automobile 228
 Toxic effects of motor-vehicle exhaust (L E Crooks) 540
- Tractor Testing Forms**
 Recommendations for 30
 Revised 541
- Tractors**
 Attachments may defeat their purpose 252
 Harvesting in hilly country 250
 Interference in turning 251
 Modern applications of power take-off 249
 Percentage of power to be taken for propelling 251
 Power take-off for 249
 Testing forms 30
 Recommendations for 30
 Revised 545
- Trade**
 International relations 495
 Latin-American 201
 World 596
 World international 582
- Traffic and Transportation**
 Aerial 533
 Automotive, preventive service 515
 Congested city districts 158
 Congestion 526
 On Manhattan Island 430
 Plans for relieving 608
 Coordination of railroad and motor truck will establish economic 432
 Delays at stations 354
 Frontier facts in air 432
 Future development 158
 Handling freight at railroad terminals 532
 Increased vehicle load-factors 125
 Mechanical control 158
 Motor as a passenger-carrying agency 158
 Motorcoach 158
 Motorcoaches versus street cars 430
 National control of 591
 Railroad freight 533
 Regulation on highways 423, 433
 Reliability as a factor in efficiency of air 611
 Tendency is toward motorcoaches 432
 Terminal expense 540
 Urban 430
 Traffic congestion and plans for relieving it (Harold M Lewis) 430
- Training**
 Aim of 399
 Conferences versus, foremen 302
 Training employees in production work (Lillian M Gilbreth) 301, 399
 Training for repair shop, course of 203
 Training repair shop personnel (J F McDonald) 202

Training the foremen of a manufacturing organization (Louis Ruthenburg)	302, 350	U	Uniform system of road signs	267	Water	Causes corrosion	517
Transition from motor-truck type of rail-car	74		Universal-joint assembly and carrier-bracket in brake-control system	88		Deposition of, destroys oil-film and attacks metal	605
Transmission Division, S A E, activities	414, 543, 544		Universal-joint yokes, test of	383		Prompt supply of fresh oil needed to combat deposition	606
Transmission noises and their remedies (Earle Buckingham)	21, 62		Use of radio for aerial navigation and military purposes (W H Murphy)	430		Water-cooled engines, handicaps of	502
Transmission session at Semi-Annual Meeting	20		Use of words	447		Wear and pressure distribution in brakes	66
		V				Wear, investigation of tire	228
Transmissions						Wearing parts concentrated in removable units in rail-cars	79
Advantages and disadvantages of the hydraulic	133		Vacuum-type governor	269	Weight		
Automatic hydraulic drive	132		Valve-gears of airplane engines	505		Airplane parts	476
Belt drive	129		Valve-springs, breakage cured by conical springs	198		Philosophy of reduction of automobile	436
Case inspection	382		Valves, poppet	31		Powerplant, of airplanes	497
Characteristics of an inertia-type	139		VAN ZANDT, J P, ON COMMERCIAL AVIATION	533, 534		Weiss transmission	136
Constantinesco torque converter	140		VAN ZANDT, J P, ON FRONTIER FACTS IN AIR TRANSPORTATION	354		WEMP, E E, ON HISTORY OF AUTOMOTIVE-CLUTCH DEVELOPMENT	361
Counter three-gear forging inspection	382		VAN ZANDT, J P, ON RELIABILITY AS A FACTOR IN AIR-TRANSPORTATION EFFICIENCY	423, 433		What is safe speed? (H C Dickinson and C F Marvin, Jr)	12, 81, 384
Efficiency experiments on trucks	539		Variable-throw transmissions	134	Wheels		
Friction drive	129					Construction of disc	538
Friction, for automobiles	210		Varnish			Heavy-duty vehicle using pneumatic tires	538
Howard inertia	139		Cracking starts in color and rubbing coats at scratches in finishing	186		Inspection	384
Hydraulic	131		Sunshine and heat cause rapid failure	185		Motor-vehicles with multiple	237
Hydraulic control and operation	614		Usual process and coats for automobile finishing	184		Prevention of shimmy by hydraulic steering-control	490
Hydraulic-drag	130		Vauclain, S M, address	528		Wheels for pneumatic tires on heavy-duty vehicles (E A Clark)	538
Inertia-type	138					WHITBECK, J E, ON OPERATION OF AIR MAIL SERVICE	422, 486
Infinite variability	130		Velocity			WHITE, J W, ON PREVENTION OF SHIMMY BY HYDRAULIC STEERING-CONTROL	490
Lavaud	134		Frictional force affects lubricant	289		WILSON, LIBUT-COM E E, ON AIRCRAFT-ENGINE DEVELOPMENT	430
Mechanical-drag	130		Lubricant, effect of, on	289		Windings, pair of, gives three positions of bulb	574
Noises and their remedies	21, 62, 460		Sound in chasses	4		Wing-areas, control-areas defined in terms of	439
Optimum reduction ratio	128		Velocity governor	269		Wings, airplane	477
Performance comparisons	374		Vibrating apparatus, description of new	546		Wire and cable, insulated	31
Principles of automatic operation	138					Wood-working tools, safety	483
Pros and cons of sliding-gear type	127		Vibrations			Words, use of	447
Ratchet drives	135		0.001 in. are tiresome	190		Work guaranteed by shop and men	162
Remedies suggested for noise	20		Excessive, in automobiles, effects of	92		Working model of steam cooling-system	328
Representative described	20		Synchronous, of parts	93		World afraid of production	451
Spline shaft inspection	381		Viscosity			World coal production	349
Unconventional, some recent work on	20, 127, 613		Permanent changes in, causes of	265		World international trade	582
Use of gyroscopic principle	141		Possibilities of less dependence upon	61		World petroleum production	458
Variable-throw	134		Volatility			World trade	596
Weiss	136		Fuel	57		World trade in gasoline	408
TRASK, C A, ON FRICTION TRANSMISSION FOR AUTOMOBILES	210		Gasoline, study of variations in	416		World's stock of monetary gold	216
Travel between Boston and Portland	524					Woven and molded friction facings compared	362
Treasurer's report	5					Wren airplane, predictions fulfilled by	438
Trend of large commercial motor-vehicle design (A F Masury)	236					Wright 12-cylinder engine	501
Trouble diagnosis session at Service Engineering Meeting	518					Wright Brothers medal award, no	126
Truck Division, S A E, activities	544						
Truck Tanks							
Proposed regulations	544						
To be regulated	267						
Truck transmission efficiency experiments (L M Porter)	539						
Trunnions, engine proposed	151						
Tube fittings, flared-type approved	322
